

DEcentAI

Decentralized AI Compute Infrastructure

Investor Presentation | May 2026

LIVE

ai.decantai.com

ICO

ico.decantai.com

TOKEN

DECNT / Solana

PRICE

1 SOL = 1,000 DECNT

The Centralization Problem

AI is controlled by three companies. That is not a feature.

Privacy

Every prompt you send is logged, stored, and potentially used to train their next model. There is no way to verify otherwise.

Cost

ChatGPT \$20/mo. Claude Pro \$20/mo. Gemini \$20/mo. You pay whether you use it or not. No refunds for idle months.

Control

One corporate decision, regulatory action, or outage can cut off your access to tools your business depends on.

Waste

Average consumer GPU utilization globally: under 8%. Billions of dollars of idle compute earning nothing.

DEcentAI — The Solution

A decentralized marketplace where anyone can host AI and anyone can use it privately.

Centralized AI

\$20/month subscription

Your data stored on corporate servers

One provider, take it or leave it

You pay to use AI

Logs your conversations

DEcentAI

Pay per prompt — fractions of a cent

Data never leaves the host machine

Open marketplace — compete on price

You earn DECNT by hosting AI

Architecturally cannot see your prompts

What You Can Create

Multi-modal AI tools, all decentralized. Live today.

Studio Composer

Combine AI-generated backgrounds, foregrounds, and audio into MP4, WebM, GIF, or animated Telegram stickers. Five output formats from one composition.

Auto BG Removal (AI)

ML segmentation via rembg/u2net (MIT) removes backgrounds cleanly — even on dark subjects, complex thumbnails, or hair-edge cases that chroma key cannot handle.

AI Stickers + Audio

Animated WebP stickers for Telegram via @decntai_stickers_bot, plus text-to-speech (piper, NeuTTS) and text-to-music (Stable Audio). Voice over your visuals.

Promo Cards + Image/Video

Branded launch graphics, AMA cards, listing alerts. Plus diffusion-based image and video generation (DreamShaper, SD, SDXL, Z-Image-Turbo, AnimateDiff-Lightning, LTX-Video).

The DEcentAI Advantage

Four properties no centralized AI platform can match.

Pay Per Task, Not Per Month

Subscription pricing excludes the long tail. DEcentAI charges fractions of a cent per task, \$0 when idle. Pay for what you receive — nothing more.

Privacy by Topology

SSH tunnels route prompts directly to host machines. The platform is architecturally excluded from the data path. Privacy is an engineering constraint, not a policy promise.

Two-Sided Marketplace

Idle GPU hardware becomes income-generating infrastructure. Providers earn 80% of every task — the highest share in decentralized AI. Supply scales with demand organically.

Resilient by Design

No single corporation can shut down the protocol. Providers, encrypted tunnels, and Solana settlement keep the network running even if the operator disappears. AI compute as infrastructure, not service.

How It Works

Four actors, one atomic transaction.

1

User

Visits ai.decentai.com, picks a provider from the marketplace, sends a prompt

2

Platform

Routes session setup. Never touches prompt data — structurally excluded from the data path

3

Provider Node

Runs AI inference locally on their GPU/CPU. Returns response through encrypted tunnel

4

Solana

Splits payment: 80% host · 19% platform · 1% referrer. Settles in under 1 second

Every prompt is private. Every payment is instant. No subscription.

Security Architecture

Privacy enforced by design, not by promise.

Structural Privacy

SSH tunnel routes directly to host node. Platform server is architecturally excluded from prompt data. Cannot be changed by policy.

SHA-256 Verification

Model hash checked every 60 seconds. If the model loaded on a node doesn't match the registered hash, the node is immediately suspended.

TPM / TEE Attestation

Hardware-backed proof that the provider machine is genuine. Tamper-evident at firmware level. Attestation report published on-chain.

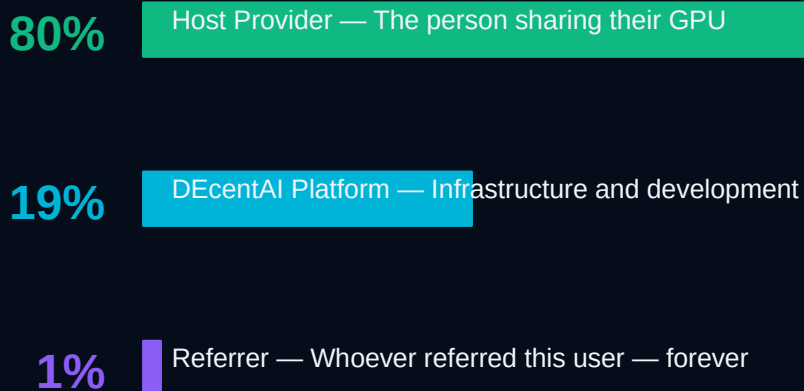

Economic Alignment

Providers earn by serving honestly. Malicious behaviour destroys reputation scores and income stream. Security improves as network grows.

Incentive Architecture

Every participant earns. The network grows itself.

Every Prompt Payment Splits:

Referral Flywheel

You share your referral link
Someone registers through it
They use AI — pay per prompt
You earn 1% of every payment
Forever. No cap. On-chain.

Refer 10 active users = 10× passive income
No claiming. Automatic. Every prompt.

Anyone Can Host

9 hardware tiers — from gaming laptop to server rack.

CPU Low

4–8 GB RAM

5–12 t/s

CPU Mid

8–16 GB RAM

3–8 t/s

GPU Entry

RTX 3060 4GB

20–40 t/s

GPU Mid

RTX 3070 8GB

30–60 t/s

GPU High

RTX 4090 24GB

40–80 t/s

GPU Extreme

24GB+ VRAM

50–120 t/s

Multi-GPU

80GB+ total

100–300 t/s

Apple Silicon

M1–M4

20–60 t/s

Server

Enterprise

300+ t/s

DECNT Tokenomics

Fixed supply. Permanent. On Solana.

Token Details

Blockchain: Solana
 Standard: SPL Token
Mint: Permanently DISABLED
 Supply: Fixed — cannot increase
 Contract: A3GTCErwHYax...qXvX
 Explorer: solscan.io

Roadmap

Live today. Growing fast.

Q1 2026 ✓

- ▶ Token live on Solana mainnet
- ▶ AI marketplace live
- ▶ Pre-ICO platform live
- ▶ Referral system active
- ▶ SHA-256 node verification
- ▶ 54 models, 9 hardware tiers

Q2 2026 ✓

- ▶ dcentai-runtime (replaces Ollama)
- ▶ TPM/TEE attestation
- ▶ Reputation scoring system
- ▶ Provider earnings dashboard

Q3 2026 ✓

- ▶ Image, Video, Audio gen LIVE
- ▶ AI Stickers + Promo Cards
- ▶ Studio + AI BG Removal
- ▶ Configurable payment splits

Q4 2026

- ▶ AI Agent Orchestrator
- ▶ Raydium DEX + Wormhole bridge
- ▶ DAO governance + staking
- ▶ CEX listings + mobile app

The Team

Human vision. AI execution.

Tamas Mihalyi

CEO & Founder

Visionary behind DEcentAI. Built the platform from scratch driven by the belief that AI should be owned by the people who use it, not by corporations who profit from harvesting their data.

z3r0tru5t

CTO / Claude AI 4.6

Frontier AI model driving core architecture. Designed TPM attestation, SHA-256 verification, dcentai-runtime, and the security model that makes structural privacy possible.

m3shr00t

Blockchain Architect / Qwen 3.5

Distributed systems AI. Built the Solana payment layer, provider tier classification, and multi-node routing protocol.

h34rtb34t

Community / Granite 4

Enterprise AI managing community operations. Handles onboarding, support, and keeps the conversation going across Telegram, Discord, and X.

How to Participate

Pre-ICO is live. Get in before the market prices it.

1

Register

Go to ico.decntai.com and create your account. Email verification required.

2

Generate Wallet

The platform generates a Solana wallet for you. Save your seed phrase.

3

Fund & Buy

Send SOL to your wallet. 1 SOL = 1,000 DECNT + 20% early bonus.

4

Airdrop

Complete social tasks (Twitter, Telegram, Reddit) to earn free DECNT.

ico.decntai.com | 1 SOL = 1,200 DECNT (with bonus) | t.me/decntai1

**"Your hardware.
Your rules.
Your earnings."**
